Belay[®] Insecticide—For Foliar or Soil Use in Vegetables

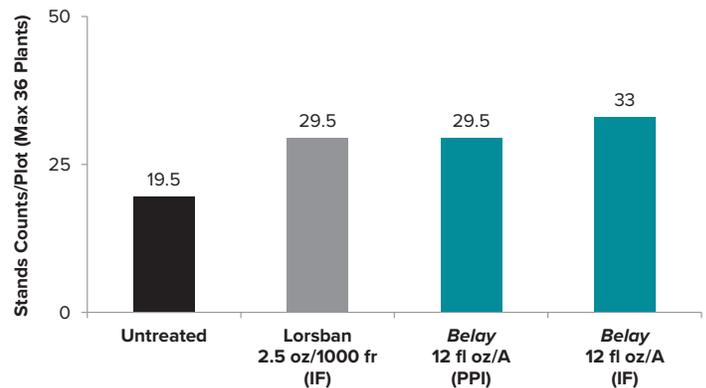

Belay[®] Insecticide is a broad spectrum insecticide for hard-to-control pests in vegetables. This uniquely effective insecticide is known for control of aphids, stinkbugs, beetles, soil pests and a broad spectrum of other chewing and sucking pests.

- ▶ **Broad Spectrum**—controls aphids, flea beetles, leafhoppers, stinkbugs and more. Offers suppression of leafminers, thrips and whiteflies.
- ▶ **Reliable**—translaminar action quickly reaches pests where they feed for maximum yield protection. Systemic when applied to soil.
- ▶ **Flexible IPM Tool**—soil and foliar uses. Effective and softer on insect predators than older chemistries, such as organophosphates, synthetic pyrethroids and carbamates.

Wireworm and White Grub Control—Sweet Potatoes

Cabbage Maggot Control

- Preplant Incorporated (PPI) treatments applied June 11
- Bifenthrin applied July 10 in Lorsban[®] treatment only
- Demo conducted by Hocutt Farms, Sims, NC

- IF = In-furrow at-planting or transplant
- PPI = Preplant Incorporated

How To Use

Seasonal Rate Max	12 fl oz/A (see reverse for crop/rate instructions)
Foliar Application Interval	7–10 days, depending on crop
REI	12 hours

	Label Rate Range (fl oz/A)	Labeled Pests	Recommended Rate (fl oz/A)	PHI
Brassica (Cole) Leafy Vegetables				
Foliar	3–4	Aphids, bagrada bugs, flea beetles, harlequin bugs, leafhoppers, stinkbugs, whiteflies*	4	7
Soil	9–12	Aphids, flea beetles, harlequin bugs, leafhoppers, leafminers*, thrips*, whiteflies*	12	21
Cucurbit Vegetables				
Soil	9–12	Aphids, cucumber beetles, flea beetles, leafhoppers, leafminers*, thrips*, whiteflies*	12	Apply no later than 4th true leaf stage
Leafy Vegetables				
Foliar	3–4	Aphids, flea beetles, leafhoppers, whiteflies*	4	7
Soil	9–12	Aphids, flea beetles, leafhoppers, leafminers*, thrips*, trash bugs (earwigs, crickets, ground beetles), whiteflies*	12	21
Tuberous and Corm Vegetables, including Potatoes and Sweet Potatoes				
Foliar	2–3	Aphids, Colorado potato beetle, flea beetle, leafhoppers	2–3	14
Seed Piece	0.4–0.6/100 lb seed	Aphids, Colorado potato beetles, flea beetles, leafhoppers, potato psyllids*, wireworms	0.4–0.6/100 lb seed	Apply at planting
Soil	9–12	Aphids, Colorado potato beetles, flea beetles, leafhoppers, exotic white grub, potato psyllids*, sweet potato weevil, wireworms*	12	Apply at planting

*Suppression only

Note: *Belay* is toxic to bees. Refer to label use information and environmental hazards prior to use.
