

Reduce Culls from Sun Damage and Increase Profits

Raynox® Organic II Sunburn Protectant[†] is the newest OMRI Listed proprietary formula in the trusted Raynox® brand family. *Raynox Organic II* significantly increases the percentage of premium fruit at packout by protecting fruit from sunburn browning with a thin, UV-resistant coating. The coating is transparent and consists only of food-quality ingredients. Independent third-party studies show that even under very extreme sunburn conditions, *Raynox Organic II* provides excellent protection for organic apples.

- ▶ Prevents sunburn browning
- ▶ Does not leave a visible residue
- ▶ Does not harm beneficial insects
- ▶ Available in 30-gallon drums and 300-gallon totes
- ▶ NOP compliant and OMRI Listed for use in organic production

Raynox Organic II Protects Apples from Sun Damage

Independent trials demonstrate that *Raynox Organic II* produces more high-quality apples that can be harvested, resulting in more grower profits. *Raynox Organic II* also delivers results that are as good, or better than, the original *Raynox Organic* formulation with improved stability for storage and transportation.

Each data point represents four replicates. Differences between all treatments and the untreated control are statistically significant at $p < 0.10$. Letter designations indicate groupings with statistical differences from each other within each trial. Source: Valent U.S.A.

Raynox® Organic II
